**Sustainable Urban Transportation: Concepts, Policies and Methodology**

**13th December, 2004 (Monday)**

---

**Background:**

Sustainable urban transportation refers to the environmental, economic, financial and social sustainability of an urban transportation system. The achievement of sustainable urban transportation requires multi-disciplinary inputs and collaboration. In view of the broad agreement that present trends in world transportation are not sustainable, enormous efforts have been made to achieve sustainable urban transportation both in the developing and developed countries. This one-day workshop, jointly organized by the Hong Kong Society for Transportation Studies and the Department of Geography at the University of Hong Kong, aims to bring about experts in different parts of the world to share views on the latest concepts, policies and methodology of achieving sustainable urban transportation.

**Objectives:**

The workshop is intended to be a specialist meeting for participants from different parts of the world to exchange ideas on the current state of practice and future prospects of sustainable urban transportation.

**Target Groups:**

Postgraduate students, practitioners, academics, researchers who are working in the broad field of transportation.

**Venue:**

Theatre C, Chow Yei Ching Building, The University of Hong Kong, Pokfulam, Hong Kong

**Program:**

1:45 - 2:00 pm: Registration

2:00 - 6:00 pm: Workshop

Welcome Speech: 2:00 pm - 2:05 pm (Dr. M.R. Peart, Head, Department of Geography, The University of Hong Kong)
